PROLOGUE

Country wide a serious thinking is going on for the last several years on professionalism in teacher preparation. There are debates, serious discussions and arguments on various issues related to teacher preparation and duration of course. After 1986 there is no policy on teacher education. Verma committee created a dent with its recommendations for professionalization of teacher education with two years rigorous training of
pre-service teachers based on the philosophy of National curriculum framework 2005 and 2009 to prepare a professional and humane teacher.

NCTE two year B.Ed programme has brought a paradigm shift from conventional teacher centric to learner centric curriculum. This programme intends to create teachers as reflective practitioners.

Present curriculum designers scaffold the rigour of the framework which has made a comprehensive coverage of theory and field engagement with the child, school and community. Main focus is on three broad areas: Perspectives in education, Curriculum and pedagogic studies and Engagement with the field. It has brought a unique amalgamation of holistic perspectives by creating space for inter-disciplinary approach with themes cutting across the curriculum.

Special impetus is given to enhance professional capacities of student teachers (EPC’s) to create professionalism in the preparation. The mode of transaction consisted of varied dimensions to learn through case studies, group presentations, project discussions, reflective documentations, workshops, tutorials and so on. Department level core committee made rigorous exercise, deliberated, discussed on curriculum right from the structure to that of framing curriculum.

The unique features of this curriculum are:

- Themes cutting across the curriculum
- Reflective practices
- Inclusion
- Gender
- CCE
- Creditisation
- Semesterization
- e-Portfolio assessment
- interdisciplinary approach

This curriculum created a space for introspecting oneself, emerging into reflective, autonomous, acceptable, empathetic, creative humane teacher with integrity to become a responsible citizen and lead the nation towards a progressive developed nation.

**Semester Grade Point Average (SGPA)**

**Credit Points for the paper** = No. of Credits assigned for the paper x Grade Point secured for that course/Paper.

**SGPA** indicates the performance of a student in a given Semester. SGPA is based on the total credit points earned by the student in all the courses and the total number of credits assigned to the courses/papers in a Semester.

**Note:** SGPA is computed only if the candidate passes in all the papers (gets a minimum ‘C’ grade in all the Papers)

\[
SGPA = \frac{\text{Total Credit Points in the Semester-1}}{\text{Total Credits in the Semester-1}}
\]

**Cumulative Grade Point Average (CGPA)**

CGPA refers to the Cumulative Grade Point Average weighted across all the semesters (4 Semesters). CGPA is obtained by dividing the total number of credit points (CPts) in all the semesters by the total number of credits in all the Semesters. The final result at the end of all the semesters is declared in the form of CGPA.

**Note:** CGPA is calculated only when the candidate passes in all the papers of all the semesters.

Ex: Faculty of Education

\[
\text{CGPA} = \frac{\text{SGPA of I Semester x Total Credits of I Sem}. + \text{SGPA of II Semester x Total Credits of II Sem}. + \text{SGPA of III Semester x Total Credits of III Sem}. + \text{SGPA of IV Semester x Total Credits of IV Sem}.}{\text{Total Credits of I Semester} + \text{Total credits of II Semester} + \text{Total credits of III Semester} + \text{Total credits of IV Semester}}
\]

**Note:** The result of the successful candidates shall be classified as follows:
i. First Division with Distinction: CGPA from 9.00 to 10.00
ii. First Division: CGPA from 8.00 to 8.99
iii. Second Division with 55%: CGPA 7.00
iv. Second Division: CGPA from 6.00 to 6.99
v. Pass Division: CGPA from 5.00 to 5.99

What transformation it brought in you? What promise you made after the experience, how you experienced contentment after the activity?

II. Electronic Portfolio Assessment – 25 marks

All the students should compile the works done during internship program all through 120 days. What is that I liked the most, to say it is the excellent work I could perform and also some things to share with everybody? These things for instance a student must have prepared a good teaching aid, drama, observation, assembly activity, a rally, pictures or
work done displayed in the school. Students should capture all the images electronically and create a digital e-portfolio to visualize the real field realities to understand the interwoven aesthetics hidden in the works done. It shows the creativity & ingenuity of the students and ingenuity of the student’s and their presence. All the excerpts they think good and their peer group feel it is well done such of the works can also be placed in the portfolio. Also student should show other works in a separate folder for the consumption of faculty to adjudicate the best from their point of view.

This kind of compilation leads to self reflection, self analysis, self –judgment and self image and self confidence. It gives space for more transparency and visibility to the self and also to the teacher, parent and community. Some of the best e-portfolios can be placed on the college websites to motivate other teachers and student-teachers. They also improve the skills of documentation, visualization of the work done to the self and others. Students develop skills and learn by sharing with others. This generates thinking self questioning and self motivation and a zeal to work. Colleges’ can select the best portfolios to encourage the quality of students work.

**Resources for creating effective teaching portfolios:**

a. PDF documents – Electronic version of the documents are prepared on the Adobe acrobat software which is easy to store and share them with others.

b. Databases – Tracking students’ work is possible with FileMaker Pro. With this database, teacher can catalogue work and produce profiles across group of students.

c. Multimedia authoring software – HyperStudio is one of the early software while many teachers use advanced ones such as MS PowerPoint, Macromedia Director or eZedia’s eZediaQTI.

d. Videos – Generally the videos in digital form have great flexibility and provide interactive elements displaying the elements of the portfolio.

e. Websites – Sharing the portfolios easily is possible when they are placed on the internet as they have audio and video presentations. These are available on the website – http://electronicportfolios.com/portfolios/bookmarks.html#vendors.

f. Ready-made software packages – My ePortfolio is available Learning Quest while Learner profile can be accessed on Sunburst websites which are of database nature to build the portfolios with fields to attach files of written or video products.

**Steps in creating e-Portfolio for Internship and whole course:**

The manner in which electronic portfolios are created and used is given below:

i. **Determining the portfolio requirements:** The essential aspects to consider here are - products, media for use and criteria. These are available on many of the rubrics for evaluating the quality of portfolio. Student teachers can create a layout creatively & present by utilizing different resources provided below to create their own e-Portfolios for assessment. There is no fixed sequence; the student teacher has freedom to organize, theoretically, chronologically, event-wise, category-wise. This would enable each student to present their portfolios as per their criteria, interest & creativity.

ii. **Creating the structure:** Different sections of the portfolio are presented on the medium by choosing the PowerPoint or other software. Students can design the sequence of their e-portfolio as per their work and quality of their work and the aspects they would like to present from the beginning to the end. Any unique experiences students want to highlight, such as lesson
Plans, aids, reflections, children’s responses, teacher appreciation, classroom presentations, learning, and so on can form a part of their e-portfolios.

iii. Adding and linking components: The media and products created need to be added to structure the portfolio. Since e-portfolios are open & flexible to keep on adding & enhancing till they present for the final adjudication, it not only gives a grade / score but a kind of self-reflection and a great sense of achievement and accomplishment. When they look back it is great to see & share.

iv. Monitoring the products and receiving feedback periodically: Products are reviewed by teachers to find out if criteria are met. Student teachers can have an opportunity for self monitoring & feedback from friends, peer group, school, supervisors, and mentors at the college / teacher educators to enhance the presentation and assessment.

v. Reflecting on the products and make necessary revisions: Components of the portfolio are modified based on the feedback. Each and every item presented can be rated on a ten-point scale & rate where the student’s work stands and at the end of the each item that he / she places in the e-portfolio, record your reflections on it.

Student teachers can share their e-portfolios in group & place them at their college’s website for review.

This e-portfolio makes a student teacher to not only reflect on their work transparently, but also helps them to learn many skills of compilation, pooling resources, organization, presentation and also technological skills and various e-resources, software, Open Education Resources and so on.

The steps in the creation and the use of electronic teaching portfolios are schematically represented as shown below:

- Determining the portfolio requirements
- Creating the structure
- Adding and linking components
- Monitoring the products and receiving feedback periodically
- Reflecting on the products and make necessary revisions

MICROTEACHING SELF-ANALYSIS FORM

Name of the teacher: ____________________ Date: ____________

Concept taught: ____________________ Roll No.: ____________

Replay the DVD of your microteaching session as needed to collect data for the following items. Analyze the collected data and draw conclusions with respect to the behavior addressed in each item.

1. Teacher talk versus student talk. Set up a small chart as follows:

   Teacher talk: ____________________

   Student talk: ____________________

   Silence or confusion: ______________

2. As you view your microteaching tape, place a tally on the chart to represent who was talking approximately every 3 seconds. If no one was talking or if many people were talking simultaneously, then place a tally in the silence or confusion category. When you have finished, count the number of tallies in each category as well as the total number of tallies in the categories teacher talk and student talk combined. Use the following formulas to determine the percentage of teacher talk and student talk:

   Percentage of teacher talk = \[
   \frac{\text{Tallies in teacher talk category}}{\text{Total tallies in teacher talk + student talk categories}} \times 100
   \]

   Percentage of student talk = \[
   \frac{\text{Tallies in student talk category}}{\text{Total tallies in teacher talk + student talk categories}} \times 100
   \]

2. Filler words. Record the filler words or sounds ("okay," "you know," or "uh") and the number of times each was used:

3. Questions. Record the number of questions asked:

   Convergent: ____________________
4. Student names. Record the number of times students are addressed by name:

5. Pauses. Record the number of times pauses are used to give students time to think:

6. Reinforcement. Record the number of times reinforcement is used:
   
   Verbal Reinforcement: __________________________
   
   Nonverbal Reinforcement: __________________________

7. Sensory channels. Record the number of times students are required to change sensory channels:
LEARNER SATISFACTION FORM Format - 6

2. What would have increased your satisfaction?
The objective of reflective teaching is to equip and empower the student teachers with the skills, competencies required to handle a real classroom. Period plan is prepared with all the required procedures and practiced before their peers and teacher educators. Peer group act as students and also give feedback. Student teachers will develop clear understanding & competencies to transact curriculum in a desirable procedure by practicing in a simulated situation.

Each student teacher has to teach 2 sessions of 20 minutes duration of each session. It is a peer group teaching. Each session focuses on whole teaching behaviours.

The format of lessons for Reflective Teaching is similar to the Period plan used in the school. Formats are given below:
